

ERB-Seagull conference

Actions for sustainable growth in Euroregion Baltic

Gdansk December 2 – 4 2004

Workshop 2

How to develop Innovative centres and clusters in ERB

- **Presentation by Mr Petter Boye**
 - Report *“The role of regional industrial platforms and clusters in the development of the Euroregion Baltic*
(Executive summary, full report on web soon)
 - Few comments:
 - Key success factors
 - Results are scalable (Science Parks and smaller settings)
 - Local adaptation

ERB-Seagull conference

Actions for sustainable growth in Euroregion Baltic

Gdansk December 2 – 4 2004

Workshop 2

How to develop Innovative centres and clusters in ERB

- But, if local adaptation, why work together in ERB?
 - Because:
 - Need for continued knowledge building, exchange of experiences leading to "real" co-operation, companies, researchers
- Mr Jacek Jettmar:
 - Regional innovation strategies
(to be included in written workshop report)

ERB-Seagull conference

Actions for sustainable growth in Euroregion Baltic

Gdansk December 2 – 4 2004

Workshop 2

How to develop Innovative centres and clusters in ERB

– Comments on the draft JTDP

- Proposed study analysing the research institutions and resources in ERB. OK
- Concrete model for the start-up phase: Modify. Not only one model...local adaptation.
- Triple Helix-**like** models. Also need to establish good conditions for cluster development
- Good conditions for network working with **specific tasks** needed to enable a sustainable further cooperation. Base in WP3.

ERB-Seagull conference

Actions for sustainable growth in Euroregion Baltic

Gdansk December 2 – 4 2004

Workshop 2

How to develop Innovative centres and clusters in ERB

- Proposal for new project:
 - Kaliningrad Center on Innovation and Technology
- New funding for deeper, actual partnership for the business sector.
- Final reflection:
ACTION!
